

Code Challenge:

Make a login form inside the panel. Form will include one e-mail field, one password field, one submit button and signup link in the end.

Note: Do not test your code here. Instead use netbeans. The bootstrap code output may not be legible in the small window here.

Your Code () Solution ()

```
1      <title>Panels in Bootstrap</title>
2  </head>
3  <body>
4      <div class="container">
5          <div class="row">
6              <div class="col-xs-4 col-xs-offset-4">
7                  <div class="panel panel-primary">
8                      <div class="panel-heading">
9                          <h4>LOGIN</h4>
10                     </div>
11                     <div class="panel-body">
12                         <form>
13                             <div class="form-group">
14                                 <input type="email" class="form-control"
placeholder="Email" name="e-mail" required = "true">
15                             </div>
16                         </div>
17                     </div>
18                 </div>
19             </div>
20         </div>
21     </div>
```
